Indian Red Cross Society

Donate blood and help the needy tide over this difficult period

Your Safety is our priority

The blood donation process does not expose an individual to the risk of contracting COVID-19. IRCS NHQ Blood Bank is taking all precautions to ensure safety of staff, blood donors as well as patients by using thermal scanners, regularly cleaning couches, gloves, masks, etc. with disinfectants and maintaining adequate distance by practicing Social Distancing.

Blood Donors Screening Criteria

- Temperature Scanning by Thermal Scanners
- Donors are asked to wear mask, headcap, gloves and shoe covers
- Doctors and nurse take proper protective measures (PPE)
- Every time couch is cleaned with 1% Hypochlorite and new couches sheet used to cover the couch.
- History of Blood donors is taken on phone to confirm their fitness criteria

Blood Collection in Mobile Vans

With the Centre, declaring blood services as essential services, IRCS is holding blood donation camps by sending mobile blood collection units to various localities across Delhi

IRCS, NHQ is following all infection control and social distancing measures such as two couches instead of the earlier practice of four to draw blood.

There will be at least 3 metre gap between the two couches and at one time there will be no more than three people allowed in the camp. The vans are being disinfected on a regular basis.

For groups of 6 to 10 people who want to donate blood from one locality, IRCS NHQ Blood Bank will provide pick and drop facility for the same- from the pick up point to IRCS NHQ Blood Bank at 1 Red Cross Road, Delhi & back to the drop off location.
